section Anti-Pandemic CoronaVirus 2019 (COVID-19) by Quantum : In this method, it is based on bioresonance function. Bioresonance therapy is a medical treatment approach in which electromagnetic

waves can be used to diagnose and treat human and animal diseases. But here we are looking for unlimited disinfection of everything from objects and objects and (the environment including all surfaces and water and soil and air) any living thing regardless of the time and place and the distance and temperature of the environment without the need to touch or use We are without the need chemicals or any without the need kind of substance. But here we are looking for (destruction of Coronavirus 2019) unlimited disinfection of everything (internal and external) of objects and objects and (the environment includes all surfaces and water and soil and air and food) every living thing apart from the issue of time and We are the place and the distance and the temperature of the environment without the need to touch or without the use of chemicals or any kind of material. And without any change in the nature of what we disinfect with this method. And we're just deleting the Coronavirus 2019. Of course, with the lowest cost compared to other methods, we will reduce the cost by at least 90% and permanently disinfect the Coronavirus 2019 and the minimum manpower required, and very quickly we will disinfect a large area or a country in about a few minutes. We know that ultraviolet (u.v) lamps are used for disinfection. For surfaces and to the extent that the radiation penetrates that object or fluid (eg water), it kills bacteria and viruses and disinfects the environment. Of course, this radiation is harmful to the human body and causes skin cancer, which is why it is used at the time. The environment must be isolated from the rest of the environment, or it must be such that the ultraviolet light does not reach the people. In this method, we want to calculate the resonant frequency of the coronavirus 2019 or obtain it by the experiment method. Then we modulate the resonance frequency with the modulator, then with an antenna transmitter, we emit electromagnetic waves (radio transmitter antenna - mobile transmitter antenna - satellites - and mobile radio transmitters, etc.). According to previous explanations, as we said, the resonance frequency (intensification frequency) is the same as the natural frequency of the coronavirus 2019. And when we release this frequency. It will destroy Coronavirus 2019 . Due to the aggravation of the in Coronavirus 2019 , the Coronavirus 2019 will be eliminate . In this case, the ambient air, water, soil, and surfaces will be disinfected until the waves arrive. And given that we only emit a corona resonant frequency of the virus. Only Coronavirus 2019 will be eliminated. Other bacteria and viruses will have no effect and will not have any side effects on the human body or any living thing. Of course, we can add many virus and bacterial resonant frequencies to our system. Of course, it should be considered. In concrete or metal buildings, the electromagnetic waves from the transmitter will be weak and an internal transmitter must be used. Here are some basic questions.

Anti-Pandemic Coronavirus 2019 (COVID-19) : How can the quantum resonance destruction method be used in the anti-pandemic Coronavirus 2019 and the elimination of the coronavirus 2019 in direct and indirect transmission and in the infection ?

- [.Vahid Rezaei](#)

The purpose of this article is to present a new method for anti-pandemics and anti-pandemics of Covid-19 in destroying the 2019 corona virus in direct or indirect human-to-human transmission, or from insects and animals to humans, animal to animal, or from environment to human. And the destruction of the 2019 corona virus in the reservoir of infection and the source of infection. This technique is applied locally superficially, deeply, inside the whole body of organisms and climate and soil and objects. Without harming the ecosystem. Regardless of the issue of time and place. ... [more]

Direct production of Covid-19 disease antibodies in the body of Covid-19 patients by the millennial method of Native Africa

- [.Vahid Rezaei](#)

The purpose of this article is to present a new method (considering that the coronavirus 2019 (Covid-19) is a virus that is constantly changing and mutating, and each human has a specific gene, which means that the coronavirus in all people in the same way Does not show and the type of incidence is different in each person.) In the immediate treatment of patients with Covid-19 disease that has no side effects. Which is modeled on the ancient medicine of the natives of Africa. Of course, without the need to introduce foreign drugs or antibodies into the body of patients with Covid-19. We want to directly stimulate the immune system of people with Covid-19 disease. To easily and quickly identify the Coronavirus 2019. Without the need for Covid-19 disease to subside in the body first (the patient should be treated). And force the immune system to make the Covid-19 antibody. ... [more]

Conversion of electrical energy into quantum radiation of energy for the growth of the human body or any living thing (production of invisible food)

- [.Vahid Rezaei](#)

In this technology, we do not need food to supply energy and growth to the human body or any living thing. In this technology, the goal is to replace food. Food is a carrier of energy that is an intermediary to supply energy to our body. In this method, we want to directly deliver energy to the underlying layers of the body, which are the building blocks of cells (atoms). In fact, we do this by radiating energy in a quantum manner. To do this, we need a quantum map of the human body and a device that converts electrical energy into quantum radiation. ... [more]

Anti-Pandemic Coronavirus 2019 (COVID-19)

December 2020

- [Vahid Rezaei](#)

The purpose of this article is to present a new method for anti-pandemics and anti-pandemics of Covid-19 in destroying the 2019 corona virus in direct or indirect human-to-human transmission, or from insects and animals to humans, animal to animal, or from environment to human. And the destruction of the 2019 corona virus in the reservoir of infection and the source of infection. This technique ... [Show full abstract] is applied locally superficially, deeply, inside the whole body of organisms and climate and soil and objects. Without harming the ecosystem. Regardless of the issue of time and place. Research in biophysics shows that all living and non-living matter have a specific mobility and frequency that are affected by other frequencies and affect other frequencies. Living cells have their own frequencies and respond to applied frequencies. And in this method it is based on resonance. Resonance describes the amplitude phenomenon that occurs when the frequency of a periodic force (or a F-February component) is equal to or close to the normal frequency of the system acting on it. When an oscillating force is applied at the resonant frequency of a dynamic system, the system oscillates in a higher amplitude than when the same force is applied at other non-resonant frequencies, and this technique in bioresonance is a medical therapeutic approach in which Electromagnetic waves can be used to diagnose and treat human diseases in a very small space. To solve the problem of spatial range in terms of size and ... and time, radio waves can be used to transmit the resonant frequency to the Coronavirus 2019 (COVID-19) or pathogenic pathogen. Radio waves have low photon energy due to their low frequency. As a result, these waves are non-ionizing radiation. In other words, (radio waves do not have enough energy to separate electrons from atoms or molecules or to break chemical bonds. As a result, exposure to these waves does not damage DNA structures). In this method, we emit electromagnetic waves with a transmitter antenna (radio transmitter antenna-mobile transmitter antenna-satellites-and mobile radio transmitters, etc.). And the possibility of radiation widely in all directions and when we publish this frequency. It will destroy the corona virus 2019. Due to the resonance that occurs in Corona virus 2019, Corona virus 2019 disappears. To do this, the biophysical technique of absorption is used when the material is exposed to electromagnetic waves that propagate at a specific frequency. That is, the resonant frequency of the material in question and the radiation frequency are equal. In this case, after the rays hit the material, the rays contain energy or (photons). When matter has the ability to do work. That is, it is structurally capable of energy-intensive work, in other words, energy-intensive work can be done in it. If the energy of a photon that lands is equal to that particular work, its energy is absorbed by matter. As a result, a resonance phenomenon occurs that causes molecules or atoms to rotate in the radio frequency band due to the collision of an resonance beam on those atoms or molecules that are inside the corona of the virus because it is spinning rapidly in the content inside the corona. They are viruses, causing the internal decay and destruction of the 2019 corona virus or any pathogen we want to destroy. In this way we have a rapid response to the 2019 Coronavirus pandemic and receive a rapid response that includes preventing the spread of the 2019 Coronavirus and destruction in direct transmission and indirect transmission and destruction of the 2019 Coronavirus in the infection reservoir and source of infection Method In the near future we will have the end of the pandemic Corona virus 2019 and pandemics.
